

Alfito Juanda

AI & Fullstack Web Engineer

Special Region of Yogyakarta, Indonesia | +62 822 7427 2717 | alfitojuanda14@gmail.com | linkedin.com/in/alfito-juanda | github.com/aljuan14 | alfitojuanda.my.id

SUMMARY

Informatics graduate (Universitas Teknologi Yogyakarta, 2026) and AI & Fullstack Web Engineer specializing in machine learning, deep learning, and computer vision, and in delivering them through full-stack web applications. Built projects with Python, PyTorch, FastAPI, Next.js, React, and Supabase, including a journal-published facial classification system with 94.5% accuracy and a Top 10 finalist hackathon platform. Focused on data-driven solutions delivered on scope and on time.

EDUCATION

Universitas Teknologi Yogyakarta Bachelor's Degree in Informatics (S1 Informatika)	2022 - 2026
SMK Negeri 5 Telkom Banda Aceh Vocational High School, Software Engineering	2019 - 2022

SKILLS

AI & Machine Learning: Machine Learning, Deep Learning, Computer Vision, NLP, AI Agents, PyTorch, YOLOv11, FaceNet, SVM, Naive Bayes, TF-IDF, Bayesian Optimization

Web Development: Python, JavaScript, React, Next.js, FastAPI, Tailwind CSS, Leaflet.js

Data & Databases: SQL, PostgreSQL, Supabase, Data Cleaning & Validation, Exploratory Data Analysis (EDA), Data Visualization

Cloud & Tools: Docker, AWS App Runner, Vercel, Git/GitHub, Notion, Trello, Microsoft Office, Google Workspace

Project Management: Project Scheduling, Progress Tracking & Reporting, Technical Documentation, Cross-functional Coordination

Languages: Indonesian (native), English (highest TOEIC score in Aceh Province, 2022)

PROJECTS

Facial Ethnicity Detection System | Journal Publication
jsret.knpub.com/index.php/jrest/article/view/983

- Developed an ethnicity classification system from facial images that achieved 94.5% accuracy; the research was published in a scientific journal.
- Extracted facial embeddings with FaceNet (PyTorch) and classified them with an SVM tuned through Bayesian Optimization.
- Curated a custom, diverse facial dataset and exposed the model through a FastAPI backend.

Tech: Python, PyTorch, FaceNet, SVM, Bayesian Optimization, FastAPI

MediSync - AI Hospital Orchestration Platform | Top 10 Finalist, Hackvidia Arkavidia 10 2026
medisync-sand.vercel.app

- Built a hospital orchestration platform that automates patient triage prioritization.
- Integrated AI agents (Strands Agents) to generate clinical diagnosis suggestions for medical staff.
- Implemented role-based access for Admin, Doctor, and Nurse users and deployed the backend on AWS App Runner.

Tech: Next.js 16, FastAPI, Strands Agents, Supabase, AWS App Runner

jivara.web.id

- Built a real-time computer vision system that detects medications and food through a webcam using YOLOv11.
- Combined object detection with AI reasoning models to automatically cross-reference detected items for contraindications.
- Delivered instant visual alerts that warn users about dangerous medication-food combinations.

Tech: Python, YOLOv11, Deep Neural Networks, Computer Vision

Warung Tante - Integrated POS & HRIS System | Restaurant Management System

linkedin.com/posts/alfito-juanda (project post)

- Built an integrated point-of-sale (POS) and HR information system (HRIS) with real-time synchronized table states.
- Implemented geolocation-based staff check-ins restricted to a 5 km radius using Leaflet.js.
- Developed analytics dashboards for sales and staff monitoring.

Tech: Next.js 14, Supabase (PostgreSQL), Tailwind CSS, Leaflet.js

Fiscal Sentiment - Policy Text Classification | Machine Learning / NLP

- Built text classification models using SVM and Naive Bayes with TF-IDF features to support fiscal policy analysis.

Tech: SVM, Naive Bayes, TF-IDF, NLP

ShipPal - B2B Matchmaking Platform | AI Agents

- Built a B2B matchmaking platform ("Tinder for Business") that uses AI agents to match businesses.

Tech: AI Agents

Landing Pages - Warung Tante & Avocado Sandwich | Web Development

warungtante.com, avocadosandwich.my.id

- Designed and launched landing pages for a restaurant (Warung Tante) highlighting its menu and atmosphere, and for a local band (Avocado Sandwich).

Tech: Web Development

ORGANIZATIONAL EXPERIENCE

Data Sorceres | Computer Vision Division

- Developed image processing algorithms and researched deep learning implementations for real-time object classification.

Himpunan Mahasiswa Informatika (Informatics Student Association) | Research & Technology (Ristek) Division

- Facilitated technical workshops and knowledge-sharing sessions on modern web frameworks and machine learning.

UKM Robotika (Robotics Student Club) | Public Relations Division

- Coordinated communication with external partners and sponsors, and published innovation project documentation for public engagement.

ACHIEVEMENTS

- Top 10 Finalist, Hackvidia - Arkavidia 10 (MediSync) (2026)
- Highest TOEIC Score in Aceh Province (2022)
- Medal of Excellence, LKS Cyber Security (National Level) (2021)
- 1st Place, FLS2N Solo Guitar (City Level) (2021)
- 2nd Place, KOSN Karate (Provincial Level) (2021)
- 1st Place, English Debate (City Level) (2020)
